# ESSENTIAL PACKAGE

Monitoring and Evaluation Framework at Three Levels (Child Status, Caregiver Status, and Caregiving Environment)

# **Child Status**

# Inputs

- Resources received for equipment, materials and program staff
- Knowledge on ECD and CABA
- Knowledge on children's needs

### **Activities**

- Program staff trained on ECD and CABA
- Volunteers identified and trained on ECD and CABA
- Services indentified in the community
- Caregivers visited and learn how to address the needs of their children per age and stage

# Outputs

- Children receive health services when ill
- · Children have birth cards
- · Children are immunized
- Caregivers demonstrate an increase in knowledge on ECD
- Children have adequate nutrition
- Children are enrolled in ECD center

# Indicators

- % of children who are able to reach their developmental milestones that are appropriate for their age
- 2) % of children who have been active and healthy in the last month
- % of children who have all age-appropriate immunizations
- 4) % of children who receive the necessary health services when ill
- 5) % of children who are registered/have birth card
- 6) % of children who have adequate food that is appropriate for their age
- 7)% of children demonstrating attachment with primary caregiver
- 8) % of children who are enrolled in an education program appropriate for their age

## Outcome

Children are able to reach their full developmental potential

# **Caregiver Status**

# Inputs

- Resources received for equipment, materials and program staff
- Knowledge on caregivers' and household needs

# **Activities**

- Program staff trained on the needs of caregivers
- Volunteers identified and trained on the needs of caregivers
- Services indentified in the community
- Caregivers visited and learn about their needs and how to address them

# Outputs

- Caregivers receive health services when ill
- Caregivers are linked to a support system in the community
- Caregivers have access to nutritious foods
- Caregivers are linked to income generating activities (IGAs)

# Indicators

- 1. % of caregivers reporting good health
- 2. % of caregivers who feel down, depressed or hopeless
- 3. % of caregivers who have access to a support system
- 4. % of caregivers who have access to a viable livelihood

### Outcome

Caregivers are healthy and able to respond effectively to their children's needs

# **Caregiving Environment**

# Inputs

- Resources received for equipment, materials and program staff
- Knowledge of a consistent and responsive environment and what is needed to promote this

# **Activities**

- Program staff trained on ways to promote a safe and enabling environment
- Volunteers identified and trained on ways to promote a safe and enabling environment
- Caregivers visited and learn about how to provide a safe, stable and consistent caregiving environment

# Outputs

- Caregivers respond to their children's needs in a loving and caring manner
- Children are disciplined using consistent limit settings and positive discipline
- Household is safe and free of hazards
- Environment around household is clean
- · Household has a latrine
- Children receive play materials appropriate for their age
- Households are linked to community support systems

# Indicators

- % of children who have at least one consistent adult caregiver who is responsive to their needs
- 2) % of children who live in a safe and hazard free environment
- % of caregivers who provide their children with play materials
- 4) % of community support systems available for vulnerable families

### **Outcome**

Children live in safe, stable, and consistent caregiving environments
